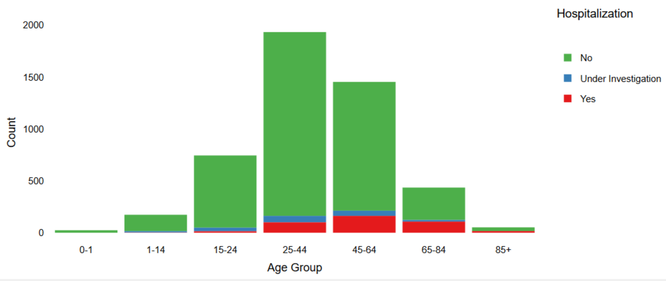
Total Utah COVID-19 Cases by Hospitalization Status and Age



Total Utah Residents Who Have Been Hospitalized with COVID-19

Hospitalization	Case Count	% of Investigated Cases
Yes	403	8.7%
No	4243	91.3%
Under Investigation	182	---

Total Hospitalizations by Age

Age	Cases	Hospitalizations	% of Cases Hospitalized
0-1	24	0	0.0%
1-14	175	2	1.1%
15-24	746	14	1.9%
25-44	1934	100	5.2%
45-64	1454	164	11.3%
65-84	437	107	24.5%
85+	52	16	30.8%
Unknown	6	0	0.0%

Data Notes:

Hospitalization Data: Hospitalizations in this table represent the total number of cases that have been admitted to hospitals. This count does not represent the number of COVID-19 cases currently in the hospital. Hospitalization data is collected from patient interviews and medical chart abstractions by Local Health Departments (LHDs). While UDOH and LHDs capture most hospitalizations through provider reporting, some patients may be hospitalized after the case was investigated by an LHD and therefore not included in this count. Hospitalizations by age may not sum to total hospitalizations because some cases are initially reported without complete age data.
